Clinical Operations *Handbook*

Elevated Health Augusta · Evans, Georgia

Version 2.0.0 · Effective 2026-06-26

Dr. Troy Akers / Dr. Dennis Williams

7013 Evans Town Center Blvd, Suite 203, Evans, GA 30809 · (706) 760-3470

Part I — Business Operations Reference

Margins shown are product margins (patient price minus medication/supply cost) — not take-home profit after staff time, rent, and fees.

4

ELEVATED plans

\$199–\$449

Price range / mo

20%

Member à la carte discount

5 + 6

IV drips + boosters

1. The four membership plans

A membership IS the program

Each patient picks one ELEVATED plan and pays one all-inclusive monthly price. That price covers the plan's medication (for Rx plans), monthly RN check-in, unlimited messaging, physician oversight, and — for HRT, TRT, and GLP-1 — the quarterly lab panel. ELEVATED IV (renamed from ELEVATED Wellness) is the non-Rx plan: no medication and no labs bundled.

Plan	Price / mo	Medication	Labs
ELEVATED IV	\$199 / mo	None — non-Rx IV membership	No labs included
ELEVATED HRT (women)	\$229 / mo	Bi-Est + progesterone cream	Quarterly panel included
ELEVATED TRT (men)	\$249 / mo	Testosterone cream (no injections)	Quarterly panel included
ELEVATED GLP-1	\$349 sema / \$449 tirz	Compounded sema or tirz	Quarterly panel included

Exactly what each plan includes

Plan	Included every month
ELEVATED IV — \$199	2 complimentary signature drips every month (any drip on the menu) · monthly RN check-in · unlimited messaging · priority booking · 20% off boosters & à la carte. No medication and no labs bundled.
ELEVATED HRT — \$229	Bi-Est cream + progesterone (plus testosterone cream if prescribed) · free quarterly hormone panel · monthly RN check-in · unlimited messaging · physician oversight · 20% off à la carte. Cream only — no troches.
ELEVATED TRT — \$249	Testosterone cream, daily and physician-titrated — no injections · free quarterly hormone panel · monthly RN check-in · unlimited messaging · physician oversight · 20% off à la carte.
ELEVATED GLP-1 — \$349 / \$449	Compounded semaglutide OR tirzepatide · monthly dose titration · anti-nausea support when indicated · free quarterly expanded panel · monthly RN check-in · unlimited messaging · physician oversight · 20% off à la carte.

Shared by every plan

Every plan: monthly RN check-in with Caroline · unlimited messaging · lab review and protocol adjustments by our physicians at no extra charge · anti-nausea support for GLP-1 when indicated · 20% off anything à la carte not already in their plan.

Paid separately

Getting started: \$79 Wellness Assessment + baseline panel (\$199 Foundation or \$299 hormone/expanded). Extra physician consults beyond standard care (\$149 Medical Review). À la carte outside their plan — members still get 20% off. Never discount twice on medication the plan already covers.

Member discount examples

20% off à la carte at checkout

Members automatically get 20% off à la carte at checkout — same menu, lower price. Any ELEVATED plan unlocks the discount. It never applies to what their own plan already includes.

Item	Normal	Member pays	Why
BPC-157 (recovery peptide)	\$249	\$199.20	Not part of their plan → 20% off
Extra Meyers IV drip	\$159	\$127.20	Beyond the 2 included → 20% off
Testosterone (for a TRT member)	Included	Included	Already in their plan → no charge
Quarterly panel (HRT/TRT member)	\$299 value	\$0	Bundled in their membership

If they cancel

The quarterly panel and 20% discount are member-only benefits. When membership cancels or lapses, the next quarterly panel bills at full à la carte pricing and all services revert to non-member prices. Re-enrolling restores benefits immediately. Say it plainly: "While you're a member it's included; if you ever drop the membership, everything goes back to à la carte."

2. What we offer (and what we don't)

Topic	What we do	What we don't
NAD+	ONLY as the \$50 IV booster add-on	No NAD+ injection, troche, nasal, or standalone infusion
Peptides	À la carte, after a Wellness Assessment	Not a walk-in or online self-serve menu
IV drips	Walk-in at the IV Lounge, no consult	Screening questions still required
Retatrutide	Physician-gated, full consent only (\$499/mo)	Not advertised; not casual à la carte
Ketamine / Spravato	Not offered	Legacy service — we do not provide it
Sexual wellness / hair	Hidden at launch	Exists but not promoted yet

3. Plan economics

Plan	Price/mo	Med	+Labs	Total	Gross	Margin
ELEVATED TRT (men)	\$249	\$36	\$57	\$93	\$156	63%
ELEVATED HRT (women)	\$229	\$58	\$61	\$119	\$110	48%
GLP-1 — Semaglutide	\$349	\$107	\$63	\$170	\$179	51%
GLP-1 — Tirzepatide	\$449	\$185–240	\$63	\$248–303	\$146–201	33–45%
GLP-1 — Retatrutide (gated)	\$499	\$250	\$63	\$313	\$186	37%
ELEVATED IV	\$199	\$90	n/a	\$90	\$109	55%

4. GLP-1 fills

Item	Cost	Price	Margin	Role
Semaglutide single fill	\$75	\$299	75%	Headline weight product
Tirzepatide single fill	\$185	\$399	54%	Headline weight product
Retatrutide (monthly, gated)	\$250	\$499	50%	Physician-selected within GLP-1 lane

5. Peptides

Item	Cost	Price	Margin
Tesamorelin	\$72	\$399	82%
SS-31 (Elamipretide)	\$50	\$249	80%
PT-141 (Bremelanotide)	\$49	\$225	78%
Healing / Wolverine stack	\$94	\$349	73%
CJC-1295 / Ipamorelin	\$79	\$179	56%
Sermorelin	\$65	\$149	56%
5-Amino-1MQ (caps)	\$79	\$119	34%

Item	Cost	Non-mbr	Member	NM %	Mbr %
BPC-157	\$66	\$249	\$199.20	73%	58%
TB-500	\$66	\$249	\$199.20	73%	58%
Wolverine (BPC + TB)	\$94	\$349	\$279.20	73%	58%
PDA (Pentadeca Arginate)	\$85	\$249	\$199.20	66%	57%

6. IV Lounge

Drip	Category	Ingredients	Price
The Resurrection	Recovery	Saline · B-Complex · Zofran · Toradol	\$139
The Meyers	Wellness	Saline · Magnesium · B-Complex · Calcium	\$159
Beast Mode	Performance	Amino acids · B12 · Magnesium · Taurine	\$169
The Shield	Immunity	Saline · Vitamin C · Zinc · B-Complex	\$149
The Glow	Glow	Saline · Biotin · Vitamin C · Glutathione	\$159

Add-on	Cost	Price	Margin
NAD+ Booster	\$7.00	\$50	86%
Glutathione Push	\$9.90	\$35	72%
B12 Shot	\$2.80	\$25	89%
Toradol Push	\$2.50	\$25	90%
Vitamin C Push	\$1.40	\$25	94%
Zofran Push	\$1.50	\$25	94%

NAD+ booster only

NAD+ is offered ONLY as the \$50 IV booster add-on. Standalone NAD+ infusion and peptide NAD+ SKUs are retired. IV supplies from McKesson/Henry Schein; compounds from FCC. The two included drips on ELEVATED IV cover any signature drip; boosters are 20% off for members, not free.

7. Hormones

Item	Source	Monthly cost	Backup
Testosterone cream (men)	Custom Pharmacy of Evans	\$30 / mo	Empower backup \$52.80
Bi-Est cream (women)	Custom Pharmacy of Evans	\$27 / mo	Empower backup \$58.10
Progesterone caps (women)	Custom Pharmacy of Evans	\$35 / mo	Empower backup \$24.00

Men's TRT

Men's TRT is testosterone cream only — applied daily, physician-titrated. We do not offer injectable (cypionate) TRT, anastrozole, or HCG.

8. Lab panels

Panel	Cost	Non-mbr	NM %	Member	Mbr %
Foundation Wellness (8 tests)	\$53.70	\$199	73%	\$159	66%
Hormone — Male (16 tests)	\$170.65	\$299	43%	\$239	29%
Hormone — Female (18 tests)	\$182.25	\$299	39%	\$239	24%
Weight / Expanded (16 tests)	\$190.10	\$299	36%	\$239	21%
Sexual Wellness (7 tests)	\$107.55	\$199	46%	\$159	32%

Panel	Tests included
Foundation Wellness (8)	CBC · Comprehensive Metabolic Panel · Lipid panel · Hemoglobin A1c · hs-CRP · TSH · Vitamin D (25-OH) · Ferritin
Hormone — Male (16)	All 8 Foundation tests + Total Testosterone · Free Testosterone · Estradiol (sensitive) · SHBG · LH · FSH · PSA · DHEA-Sulfate
Hormone — Female (18)	All 8 Foundation tests + Estradiol (sensitive) · Progesterone · FSH · LH · Prolactin · DHEA-Sulfate · Free T3 · Free T4 · Total Testosterone · SHBG
Weight / Expanded (16)	All 8 Foundation tests + Fasting insulin · Apolipoprotein B · Lipoprotein(a) · Leptin · Homocysteine · Folate · Vitamin B12 · Iron studies
Sexual Wellness (7)	Total Testosterone · Free Testosterone · Estradiol (sensitive) · Prolactin · SHBG · DHEA-Sulfate · TSH

Panel	Frequency
Foundation Wellness	At onboarding with the Wellness Assessment; then annually or when clinically indicated
Hormone — Male / Female	Baseline before starting HRT/TRT, then included every quarter (every 3 months) while a member; extra recheck after a dose change when the physician orders it
Weight / Expanded	Baseline before starting GLP-1, then included every quarter while a GLP-1 member
Sexual Wellness	Ordered when a patient is being worked up for sexual-wellness concerns

Member labs bundled

For HRT, TRT, and GLP-1 members the quarterly panel is included at no separate charge. Prices above apply to onboarding baseline and à la carte orders. Foundation Wellness is the baseline draw; hormone and expanded panels build on those same eight tests.

9. Sourcing

Category	Primary	Backup
Peptides + GLP-1	FCC / GC (PATH)	Empower (hormones / GLP-1 backup only)
Hormone creams	Custom Pharmacy of Evans	Empower (backup)
IV drips + add-ons (supplies)	McKesson / Henry Schein	—
IV compounds	FCC (Formulation Compounding Center)	—
Retail HRT (patches / gels)	DrFirst Rcopia → patient's pharmacy	On request
Lab draws	LabCorp client billing	—

10. Recent changes

Change	Meaning	Status
ELEVATED Wellness renamed	Now ELEVATED IV — the non-Rx IV membership	Live on site & receipts
Standalone NAD+ retired	NAD+ is only the \$50 IV booster add-on	Infusion & peptide NAD+ removed
No separate peptides membership	Peptides stay à la carte with the 20% member discount	Decision recorded
Retatrutide	Offered — physician-gated GLP-1 option (\$499/mo)	Full GLP-1 consent required
Metabolic stack / SLU-PP-332 / AOD-9604	Discontinued	Off the menu
Injectable TRT discontinued	Men's TRT is testosterone cream only — no cypionate injections	Off the menu
Anastrozole & HCG removed	Neither offered as part of TRT/HRT	Off the menu

Part II — Clinical Operations & SOPs

Master patient journey (ALGO-000)

Master patient journey — arrival through follow-up

End-to-end workflow: counsel → labs → review → prescribe → follow-up. Every step includes billing verification and ethical upsell checkpoints.

PHASE: ARRIVAL

0.1. Greet patient. Confirm name, DOB, and reason for visit. Offer water; direct to waiting area if consult not ready.

0.2. IF Walk-in IV only (no consult)

THEN → → Lane A: IV Lounge menu. Skip to ALGO-000 step 8.x for IV billing. Still mention programs softly (upsell).

ELSE → → Continue Phase 1 counseling

PHASE: COUNSEL & DISCOVER

1.1. Use the PUBLIC MENU (4 ELEVATED programs + IV + 3 peptide stacks). Explain: physician-owned, cash-pay, 503A-sourced compounds, Evans GA location.

Upsell: Lead with program value — medication + RN + labs + messaging — not à la carte SKUs.

1.2. Ask open questions: primary goal, timeline, prior treatments, medications, allergies, pregnancy status if relevant.

1.3. IF Symptoms suggest hormones (fatigue, libido, mood, hot flashes, low T symptoms)

THEN → Counsel: ELEVATED TRT (\$249/mo) or ELEVATED HRT (\$229/mo). Path starts with \$79 Wellness Assessment.

ELSE → Continue symptom mapping

1.4. IF Symptoms suggest weight / metabolic (BMI concern, insulin resistance, prior GLP-1)

THEN → Counsel: ELEVATED GLP-1 (semaglutide \$349/mo · tirzepatide \$449/mo). \$79 consult first.

Upsell: Advanced recomposition support (lean-mass/metabolic peptides; gated retatrutide) is layered inside the GLP-1 program at the physician's discretion — reviewed in person.

1.5. IF Recovery, longevity, cognitive, or athletic performance

THEN → Counsel: peptide options or ELEVATED IV (\$199/mo). Requires consult-gated path.

1.6. IF IV hydration, immunity, hangover, NAD+ interest only

THEN → Lane A IV menu. No consult required. Mention \$79 assessment if they ask about hormones/weight later.

1.7. Do NOT quote legacy tiers, ketamine, or pass-through pharmacy pricing. Use stripeConfig / staff cheatsheet only.

PHASE: WELLNESS ASSESSMENT

2.1. IF Patient ready for Lane B (consult-gated)

THEN → Book appointment. Run create-consultation-checkout → \$79 Wellness Assessment.

Charge: C-01: \$79 via Stripe before or at check-in

2.2. Collect intake: contact, pharmacy, emergency contact, consent links (portal). Credit \$79 toward program if they enroll within 30 days.

2.3. RN/Provider Wellness Assessment: vitals, history, physical as indicated, document candidacy for program(s).

Charge: Confirm C-01 posted — no duplicate consult charge

PHASE: LABS

3.1. IF TRT or HRT candidacy

THEN → Order Comprehensive Wellness Panel (\$199). LabCorp requisition in-office draw.

Charge: C-02: \$199 Comprehensive

3.2. IF GLP-1 candidacy

THEN → Order Expanded Panel (\$299) — metabolic + safety markers.

Charge: C-02: \$299 Expanded

3.3. IF Advanced recomposition candidacy (GLP-1 lane)

THEN → Order Expanded Panel (\$299). LabCorp requisition — weight-optimization slug.

Charge: C-02: \$299 Expanded

3.4. IF Peptide-only / Wellness path

THEN → Comprehensive (\$199) unless provider orders Expanded for specific markers.

3.5. Caroline draws labs same visit when possible. Label tubes; batch LabCorp pickup per clinic schedule.

Upsell: Offer IV drip while waiting if walk-in friendly — Lane A add-on revenue.

3.6. Log lab order in chart. Expected turnaround 3–5 business days (LabCorp).

PHASE: PROVIDER REVIEW

4.1. Provider reviews labs within 5–7 business days of draw. Flag critical values same day.

4.2. IF Labs contraindicate treatment (e.g., elevated PSA, Hct >54, pregnancy)

THEN → Phone patient; document deferral or referral. Do NOT enroll or prescribe. Charge: no program SKU.

4.3. IF Male — low T pattern + shared decision for TRT

THEN → Approve ELEVATED TRT enrollment → ALGO-005 protocol.

Upsell: If visceral fat elevated, discuss GLP-1 or metabolic stack at results call.

4.4. IF Female — BHRT candidacy

THEN → Approve ELEVATED HRT → ALGO-004 protocol.

Upsell: Sermorelin à la carte or IV NAD+ booster if sleep/recovery goals.

4.5. IF GLP-1 candidacy (semaglutide or tirzepatide)

THEN → Approve ELEVATED GLP-1 → compound via FCC.

4.6. IF Advanced recomposition candidacy + consents on file

THEN → Approve advanced recomposition support within ELEVATED GLP-1 (gated retatrutide per GLP-1 consent Section 11A) → ALGO-006.

4.7. IF Labs optimal, patient not ready for program

THEN → Offer ELEVATED IV (\$199/mo) or retest in 3–6 months. Schedule follow-up.

4.8. Kristen schedules results review call or in-person. Use CORE_SERVICES.phoneFollowUp (\$99) only per no-show / extended MD phone policy.

PHASE: ENROLLMENT

5.1. Present program recommendation with first-month total (consult + labs + month 1 program). See financial appendix.

Charge: C-03: correct ELEVATED_PROGRAMS Stripe checkout

5.2. Patient signs informed consents (hormone, peptide research, GLP-1 as applicable). Portal capture preferred.

5.3. Run program checkout (create-trt-checkout, membership flow, or program-specific edge function). Confirm webhook updates patient record.

Charge: Verify subscription active; elevated_membership_status / program field set

5.4. IF Patient declines program

THEN → Offer à la carte fill pricing with member vs non-member paths. Document shared decision.

Upsell: Show first-month economics — program usually wins vs 2–3 à la carte fills.

PHASE: PRESCRIBE & SHIP

6.1. Provider writes protocol per ALGO-004, ALGO-005, or ALGO-006. One default path — escalate only if needed.

6.2. Route Rx per ALGO-003: Hormones → Custom Pharmacy Evans (fax). Metabolic/GC peptides → GC. IV/core → FCC.

6.3. Kristen confirms fax/portal submission. Track pharmacy_id on order. GC: confirm COA on file.

6.4. Notify patient: shipment ETA, injection teaching if TRT, storage for refrigerated items.

Charge: C-04: no separate fill charge if medication included in active program

PHASE: FOLLOW-UP

7.1. Week 2–4 RN check-in (phone or in-office): tolerability, side effects, adherence.

7.2. Week 8–12 provider review: repeat labs if protocol requires; titrate dose.

Charge: C-07: quarterly labs \$0 if in-program — do not double bill

7.3. Ongoing: messaging via portal; schedule quarterly labs + RN visits per program inclusion.

Upsell: IV member discount 20% on add-ons; peptide stack add-on if new goals emerge

7.4. IF Patient misses follow-up

THEN → Kristen outreach x2. Document. Apply rebooking policy if applicable (C-08).

PHASE: RETAIN & GROW

8.1. Monthly: verify Stripe subscription healthy (no failed payments). Resolve before next fill ships.

Charge: C-03 renewal — confirm amount matches enrolled program

8.2. At every touchpoint, consult UPSELL MATRIX — one ethical offer max; never pressure.

8.3. Annual peptide re-consent; protocol changes → re-acknowledgment.

8.4. IF Margin on custom quote <15%

THEN → ALGO-008 — Dennis approval before discount.

8.5. Document outcome in chart. Loop to Phase 7 at next scheduled touchpoint. **[STOP]**

PHASE: IV LOUNGE

8.IV.1. Present IV menu: The Resurrection, The Meyers, Beast Mode, The Shield, The Glow; NAD+ \$50 booster only; add-on pushes.

Charge: C-05: menu price at checkout

8.IV.2. Caroline administers per standing orders. Document lot numbers.

Upsell: Book \$79 Wellness Assessment before they leave if any hormone/weight interest surfaced

8.IV.3. IF Active ELEVATED program member

THEN → Apply 20% member discount on IV add-ons (not base program meds).

Charge: Verify discount applied once

Upsell & growth matrix

Phase	Trigger	Offer	Charge	Script
Arrival (IV walk-in)	Patient books Myers / NAD+ only	Mention ELEVATED IV or peptide options at results review	IV today + program later	Many IV guests eventually join a program once they see their labs — we can start with today's drip and book a \$79 assessment when you're ready.
Counseling	Fatigue, weight, libido, or brain fog	ELEVATED program path vs à la carte	\$79 consult → program \$199–\$449/mo	Our programs bundle medication, RN check-ins, quarterly labs, and messaging — usually less than piecing fills together à la carte.
Wellness Assessment	Patient hesitates on labs	Expanded panel if GLP-1 / weight candidacy	\$199 Comprehensive vs \$299 Expanded	For weight or metabolic goals we recommend the Expanded panel so the physician has the full picture — it saves a redraw later.
Lab draw	Partner or friend waiting	IV Lounge add-on same visit	Myers \$185, pushes \$25–50	While labs process, many members grab a hydration drip in our lounge — walk-ins welcome.
Results review	Low T + high body fat	TRT + GLP-1 (advanced recomposition support in-program)	\$249/mo TRT or \$349–\$449/mo GLP-1	Your labs support hormone optimization; if body composition is also a goal, your physician can layer advanced recomposition support inside the GLP-1 program — reviewed in person.
Results review	Perimenopause symptoms, normal T	ELEVATED HRT + optional sermorelin à la carte	\$229/mo HRT; sermorelin \$149/mo if added	Bi-Est and progesterone are our standard — sermorelin may be added à la carte for sleep and recovery once stable on hormones.
Enrollment	Patient on single program	Second program only if clinically indicated	Additional subscription SKU	We can layer GLP-1 after TRT stabilizes — physician will confirm timing at your next check-in.
Follow-up (RN)	Recovery, injury, or athletic goal	BPC-157 and/or TB-500 (individual recovery fills)	\$249/fill each	For tissue repair we use BPC-157 and TB-500 as separate prescriptions — your physician selects one or both at your next review.
Follow-up (quarterly)	Labs due, patient active	In-program labs included; IV add-on	\$0 panel if in-program; IV member 20% off add-ons	Your quarterly labs are included — while you're here, members get 20% off IV add-ons.

Phase	Trigger	Offer	Charge	Script
Renewal / billing	Stripe payment failed	Resolve card + confirm program still fits	Recurring program charge	Your membership renews monthly — let’s update your card and confirm your protocol still matches your goals.

Billing verification checkpoints

Step	Event	Stripe SKU	Amount	Verify
C-01	Wellness Assessment booked	CORE_SERVICES.wellnessAssessment	\$79	Stripe receipt + patient.elevated_membership_status unchanged until program enroll
C-02	Lab panel at visit	CORE_SERVICES.comprehensivePanel OR expandedPanel	\$199 or \$299	Panel matches protocol (TRT/HRT → Comprehensive; GLP-1/weight → Expanded)
C-03	Program enrollment	ELEVATED_PROGRAMS.*	\$199–\$449/mo	Correct program SKU; subscription active in Stripe; webhook updated patient record
C-04	À la carte medication fill	MEDICATION_FILLS.*	Per fill price	If patient has matching program, fill should be \$0 incremental — do not double-charge
C-05	IV Lounge walk-in	IV drip / push checkout	Menu price; member –20% on add-ons	Member discount applied once; receipt matches IV menu
C-06	Metabolic peptide / gated retatrutide fill	Metabolic à la carte (SS-31, AOD-9604, etc.); retatrutide gated	Per fill price	Provider-directed à la carte; retatrutide gated/physician-selected under GLP-1 consent
C-07	Quarterly labs (in-program)	Included in program	\$0 to patient	Do not run panel checkout if active ELEVATED program covers labs
C-08	Late cancel / no-show rebooking fee	CORE_SERVICES.rebookingFee	\$99	Confirm 24-hour rule vs scheduled time. Late cancel or no-show: set rebooking_fee_required, patient pays via create-rebooking-checkout before schedule unlocks. IV refund eligible only if 24+ hr notice and service not rendered — process Stripe refund from original session; note refund ID in chart. Notify patient by email/SMS.

1. Master patient journey

The complete algorithm from front-door greeting through long-term follow-up. Every phase includes what to say, what to charge, and where to ethically upsell. Sub-algorithms ALGO-001–008 are quick-reference extracts.

2. Upsell & growth matrix

Ethical cross-sell triggers at each touchpoint. One offer per interaction maximum. Never pressure — align offer to stated patient goals.

3. Billing verification checkpoints

Eight charge events (C-01 through C-08). Kristen verifies Stripe receipt matches chart before any Rx ships or subscription renews.

4. Revenue lanes

Two booking lanes — never mix the workflow.

- Lane A — IV Lounge: open booking, cash at checkout, FCC compounds + Henry Schein supplies.
- Lane B — Consult-gated: \$79 consult → labs → ELEVATED program (\$199–\$449/mo).
- Hidden at launch: sexual wellness, hair restoration.
- Not offered: ketamine, Spravato. Retatrutide is gated/physician-only within the GLP-1 consent — never advertised, never the lead.

ALGO-001

New patient — lane assignment

Route walk-in vs consult-gated paths within 60 seconds of inquiry.

1. Ask: What brings you in today?

2. IF Patient wants IV hydration, hangover, immunity, or NAD+ drip only
THEN → → Lane A: /iv-lounge. Book IV slot. No \$79 consult required.
ELSE → → Continue to step 3

3. IF Patient mentions hormones, weight loss, peptides, or metabolic stack
THEN → → Lane B: Book \$79 Wellness Assessment (create-consultation-checkout).
ELSE → → Offer Wellness Assessment or IV menu; do not quote program prices without consult

4. Collect intake contact. Send portal link if consult booked. **[STOP]**

5. Enrollment & onboarding

From first visit to first shipment.

Post-consult — program enrollment

Standard path from \$79 consult to recurring program after labs.

1. Wellness Assessment completed in-office (\$79 charged via Stripe).
2. Draw baseline labs (Comprehensive \$199 or Expanded \$299 per protocol).
3. Provider reviews labs within 5–7 business days.
4. **IF** Male + low T pattern + shared decision
THEN → Enroll ELEVATED TRT (\$249/mo) — create-trt-checkout or membership flow.
5. **IF** Female + BHRT candidacy
THEN → Enroll ELEVATED HRT (\$229/mo) — hormone protocol ALGO-004.
6. **IF** GLP-1 candidacy (semaglutide or tirzepatide)
THEN → Enroll ELEVATED GLP-1 (semaglutide \$349/mo · tirzepatide \$449/mo). Use combo enrollment if hormones also indicated (medication-only add-on on same subscription).
7. **IF** Dual lane (weight + hormones) clinically appropriate
THEN → Anchor program + medication add-on via ElevatedComboSelector — e.g. GLP-1 + TRT add-on \$149/mo (\$498 total sema) or TRT + GLP-1 sema add-on \$249/mo. One RN visit, one quarterly lab draw.
8. Document protocol in chart. Route Rx per ALGO-003. **[STOP]**

ALGO-006

Advanced recomposition support (within ELEVATED GLP-1)

Physician-directed, gated support layered on the GLP-1 program. The standalone \$599 metabolic program was retired 2026-06-24.

1. Confirm GLP-1 consent (incl. Section 11A retatrutide disclosure) signed in portal.
2. Baseline Expanded Panel (\$299) drawn in-office — weight-optimization slug.
3. Enroll ELEVATED GLP-1 (semaglutide \$349/mo · tirzepatide \$449/mo) via Stripe. Advanced support is à la carte / gated, not a separate program SKU.
4. Anchor: semaglutide or tirzepatide per GLP-1 protocol. Retatrutide ONLY if gated/physician-selected — titrate from 0.5 mg/wk.
5. Add SS-31 + NAD+ when anchor tolerated (à la carte, provider-directed).
6. Add CJC/lpamorelin + tesamorelin for lean mass when indicated.
7. Optional: AOD / SLU / 5-amino per physician — mostly FCC lines.
8. Route GC lines through GC network; FCC for adjuncts. **[STOP]**

6. Clinical defaults

Reduce option overload — one standard path per sex.

ALGO-004

Female BHRT — standard protocol

One default stack; escalate only on intolerance or patient request.

1. Start Bi-Est transdermal cream (80:20 or 50:50). Custom Pharmacy Evans.
2. Add oral micronized progesterone 100–200 mg at bedtime if uterus intact.
3. **IF** Vitality/libido labs support micro-dose T
THEN → Add women's testosterone cream 0.5–1 mg/g.
ELSE → Hold T; recheck at 8–12 weeks
4. **IF** Cream intolerance OR patient prefers patch
THEN → Escalate: DrFirst → FDA patch/gel.
5. Quarterly labs + RN check-in included in ELEVATED HRT. **[STOP]**

Male TRT — standard protocol

Cream-based; avoid option paralysis. Injectable TRT is not offered.

1. Testosterone cream (men's dose), applied daily, physician-titrated. Custom Pharmacy Evans.

2. IF Estradiol elevated on labs

THEN → Physician reassesses cream dose. Anastrozole and HCG are not offered.

3. IF Fertility preservation requested

THEN → Discuss enclomiphene alternative (fertility-first, not classic TRT).

4. IF Patient prefers an FDA brand

THEN → Escalate: DrFirst brand gel (AndroGel/Testim).

5. IF Patient requests pellets

THEN → Shared decision only — document difficulty titrating after placement.

6. Monitor PSA, hematocrit, lipids per TRT safety protocol. **[STOP]**

7. Vendor & fulfillment

GC (peptides/GLP-1) · FCC (IV/core) · Custom Pharmacy Evans (hormones) · Empower (503A backup: creams/GLP-1/ODT, not peptides).

ALGO-003

Prescription — vendor & fulfillment channel

Every Rx goes to exactly one vendor. Never guess.

1. IF Hormone Rx (Bi-Est, progesterone, testosterone cream, pellets)

THEN → Vendor: Custom Pharmacy of Evans. Channel: fax (send-rx-fax). Default.

2. IF Metabolic stack OR retatrutide OR SS-31 OR tesamorelin OR CJC/Ipamorelin (stack line)

THEN → Vendor: GC Scientific partner 503A. Channel: GC portal / account manager.

3. IF IV premix, glutathione, sermorelin, BPC-157/TB-500, AOD, SLU, GLP-1 backup

THEN → Vendor: FCC. Channel: FormuConnect portal.

3b. IF Custom Pharmacy or GC backordered on hormone creams/GLP-1, OR patient wants ODT/oral GLP-1 or nasal modality

THEN → Vendor: Empower Pharmacy (503A backup, patient-specific bill-clinic). NOT for research/recovery/metabolic peptides — those stay GC/PATH.

4. IF Patient requests FDA patch/gel (Vivelle, AndroGel, etc.)

THEN → Vendor: DrFirst Rcopia → retail pharmacy. Not compound.

5. Log pharmacy_id on order row. Confirm COA on file for GC batches. **[STOP]**

8. Financial reference

Cost → charge → margin. See live tables in Appendix A.

ALGO-007

Staff pricing quote

Consistent quotes; member discount applied once.

1. Lead with ELEVATED program price if patient qualifies for a program.

2. IF Patient holds active ELEVATED program (TRT/HRT/GLP-1/IV)

THEN → À la carte add-ons: 20% off per pricing.ts MEMBER_DISCOUNT_PERCENT.

3. IF Medication fill matches patient's program (e.g. test fill on TRT)

THEN → Included — \$0 incremental for that fill.

4. Never quote legacy tiers, pass-through pharmacy language, or ketamine.

5. Use /staff-pricing-cheatsheet or live stripeConfig — not memory. **[STOP]**

ALGO-008

Margin review — flag before discounting

Protect clinic viability on thin-SKU quotes.

1. Open /formulary-economics before custom pricing or comps.
2. **IF** Primary margin < 15% on quoted SKU
THEN → Do NOT discount further without physician + Dennis approval.
3. **IF** Metabolic stack
THEN → GC COGS model required — never price against FCC full-dose COGS.
4. **IF** SS-31 à la carte at therapeutic daily dose
THEN → Flag: multiple vials/month — prefer bundle or raise quote.
5. Document approval in chart if exception granted. **[STOP]**

9. Role responsibilities

Who owns each step.

- Kristen: scheduling, enrollment, fax coordination, patient comms, lab requisitions, billing verification.
- Caroline: IV admin, phlebotomy, RN check-ins, standing-order tasks.
- Provider MD: protocol approval, lab review, Rx signing, escalations.
- Dennis: margin exceptions, vendor contracts, Stripe live mode, GC account.

Sub-algorithms (quick reference)

ALGO-001

New patient — lane assignment

Route walk-in vs consult-gated paths within 60 seconds of inquiry.

1. Ask: What brings you in today?
2. **IF** Patient wants IV hydration, hangover, immunity, or NAD+ drip only
THEN → → Lane A: /iv-lounge. Book IV slot. No \$79 consult required.
ELSE → → Continue to step 3
3. **IF** Patient mentions hormones, weight loss, peptides, or metabolic stack
THEN → → Lane B: Book \$79 Wellness Assessment (create-consultation-checkout).
ELSE → → Offer Wellness Assessment or IV menu; do not quote program prices without consult
4. Collect intake contact. Send portal link if consult booked. **[STOP]**

Post-consult — program enrollment

Standard path from \$79 consult to recurring program after labs.

1. Wellness Assessment completed in-office (\$79 charged via Stripe).
2. Draw baseline labs (Comprehensive \$199 or Expanded \$299 per protocol).
3. Provider reviews labs within 5–7 business days.
4. **IF** Male + low T pattern + shared decision
THEN → Enroll ELEVATED TRT (\$249/mo) — create-trt-checkout or membership flow.
5. **IF** Female + BHRT candidacy
THEN → Enroll ELEVATED HRT (\$229/mo) — hormone protocol ALGO-004.
6. **IF** GLP-1 candidacy (semaglutide or tirzepatide)
THEN → Enroll ELEVATED GLP-1 (semaglutide \$349/mo · tirzepatide \$449/mo). Use combo enrollment if hormones also indicated (medication-only add-on on same subscription).
7. **IF** Dual lane (weight + hormones) clinically appropriate
THEN → Anchor program + medication add-on via ElevatedComboSelector — e.g. GLP-1 + TRT add-on \$149/mo (\$498 total sema) or TRT + GLP-1 sema add-on \$249/mo. One RN visit, one quarterly lab draw.
8. Document protocol in chart. Route Rx per ALGO-003. **[STOP]**

ALGO-003

Prescription — vendor & fulfillment channel

Every Rx goes to exactly one vendor. Never guess.

1. IF Hormone Rx (Bi-Est, progesterone, testosterone cream, pellets)

THEN → Vendor: Custom Pharmacy of Evans. Channel: fax (send-rx-fax). Default.

2. IF Metabolic stack OR retatrutide OR SS-31 OR tesamorelin OR CJC/Ipamorelin (stack line)

THEN → Vendor: GC Scientific partner 503A. Channel: GC portal / account manager.

3. IF IV premix, glutathione, sermorelin, BPC-157/TB-500, AOD, SLU, GLP-1 backup

THEN → Vendor: FCC. Channel: FormuConnect portal.

3b. IF Custom Pharmacy or GC backordered on hormone creams/GLP-1, OR patient wants ODT/oral GLP-1 or nasal modality

THEN → Vendor: Empower Pharmacy (503A backup, patient-specific bill-clinic). NOT for research/recovery/metabolic peptides — those stay GC/PATH.

4. IF Patient requests FDA patch/gel (Vivelle, AndroGel, etc.)

THEN → Vendor: DrFirst Rcopia → retail pharmacy. Not compound.

5. Log pharmacy_id on order row. Confirm COA on file for GC batches. **[STOP]**

ALGO-004

Female BHRT — standard protocol

One default stack; escalate only on intolerance or patient request.

1. Start Bi-Est transdermal cream (80:20 or 50:50). Custom Pharmacy Evans.

2. Add oral micronized progesterone 100–200 mg at bedtime if uterus intact.

3. IF Vitality/libido labs support micro-dose T

THEN → Add women's testosterone cream 0.5–1 mg/g.

ELSE → Hold T; recheck at 8–12 weeks

4. IF Cream intolerance OR patient prefers patch

THEN → Escalate: DrFirst → FDA patch/gel.

5. Quarterly labs + RN check-in included in ELEVATED HRT. **[STOP]**

ALGO-005

Male TRT — standard protocol

Cream-based; avoid option paralysis. Injectable TRT is not offered.

1. Testosterone cream (men's dose), applied daily, physician-titrated. Custom Pharmacy Evans.
2. **IF** Estradiol elevated on labs
THEN → Physician reassesses cream dose. Anastrozole and HCG are not offered.
3. **IF** Fertility preservation requested
THEN → Discuss enclomiphene alternative (fertility-first, not classic TRT).
4. **IF** Patient prefers an FDA brand
THEN → Escalate: DrFirst brand gel (AndroGel/Testim).
5. **IF** Patient requests pellets
THEN → Shared decision only — document difficulty titrating after placement.
6. Monitor PSA, hematocrit, lipids per TRT safety protocol. **[STOP]**

ALGO-006

Advanced recomposition support (within ELEVATED GLP-1)

Physician-directed, gated support layered on the GLP-1 program. The standalone \$599 metabolic program was retired 2026-06-24.

1. Confirm GLP-1 consent (incl. Section 11A retatrutide disclosure) signed in portal.
2. Baseline Expanded Panel (\$299) drawn in-office — weight-optimization slug.
3. Enroll ELEVATED GLP-1 (semaglutide \$349/mo · tirzepatide \$449/mo) via Stripe. Advanced support is à la carte / gated, not a separate program SKU.
4. Anchor: semaglutide or tirzepatide per GLP-1 protocol. Retatrutide ONLY if gated/physician-selected — titrate from 0.5 mg/wk.
5. Add SS-31 + NAD+ when anchor tolerated (à la carte, provider-directed).
6. Add CJC/Ipamorelin + tesamorelin for lean mass when indicated.
7. Optional: AOD / SLU / 5-amino per physician — mostly FCC lines.
8. Route GC lines through GC network; FCC for adjuncts. **[STOP]**

ALGO-007

Staff pricing quote

Consistent quotes; member discount applied once.

1. Lead with ELEVATED program price if patient qualifies for a program.
2. **IF** Patient holds active ELEVATED program (TRT/HRT/GLP-1/IV)
THEN → À la carte add-ons: 20% off per pricing.ts MEMBER_DISCOUNT_PERCENT.
3. **IF** Medication fill matches patient's program (e.g. test fill on TRT)
THEN → Included — \$0 incremental for that fill.
4. Never quote legacy tiers, pass-through pharmacy language, or ketamine.
5. Use /staff-pricing-cheatsheet or live stripeConfig — not memory. **[STOP]**

ALGO-008

Margin review — flag before discounting

Protect clinic viability on thin-SKU quotes.

1. Open /formulary-economics before custom pricing or comps.
2. **IF** Primary margin < 15% on quoted SKU
THEN → Do NOT discount further without physician + Dennis approval.
3. **IF** Metabolic stack
THEN → GC COGS model required — never price against FCC full-dose COGS.
4. **IF** SS-31 à la carte at therapeutic daily dose
THEN → Flag: multiple vials/month — prefer bundle or raise quote.
5. Document approval in chart if exception granted. **[STOP]**

Appendix — ELEVATED programs

Program	Charge/mo
ELEVATED TRT	\$249/mo
ELEVATED HRT	\$229/mo
ELEVATED GLP-1	\$349/mo
ELEVATED IV	\$199/mo

Appendix — Line-item economics

Item	Vendor	COGS	Charge	Margin
BPC-157	gc	\$66	\$249	73%
TB-500 (Thymosin Beta-4)	gc	\$66	\$249	73%
Retatrutide fill	gc	\$220	\$499	56%
SS-31 (Elamipretide)	gc	\$50	\$249	80%
Tesamorelin	gc	\$72	\$399	82%
CJC-1295 / Ipamorelin	gc	\$79	\$179	56%
NAD+ Injection	gc	\$65	\$199	67%
AOD-9604	gc	\$65	\$129	50%
SLU-PP-332	gc	\$60	\$99	39%
5-Amino-1MQ	gc	\$220	\$119	-85%
Sermorelin Injection	gc	\$65	\$149	56%
Myers Cocktail premix	fcc	\$45	\$185	76%

Appendix — First-month economics

Path	Consult	Labs	Month 1 program	Total
TRT	\$79	\$199	\$249/mo	\$527
HRT	\$79	\$199	\$229/mo	\$507
GLP-1 sema	\$79	\$299	\$349/mo	\$727
GLP-1 tirz	\$79	\$299	\$449/mo	\$827

Part III — Staff Quick Reference

We start with what you want, but we confirm with labs and a physician review before any prescription. The \$79 Wellness Assessment is our front door for hormones, weight loss, and peptides — IV Lounge is walk-in without a consult.

Lane A — IV Lounge

1. Patient walks in or books IV Lounge online.
2. IV screening edge function runs hard blocks (CHF, pregnancy, G6PD for high-dose vitamin C, etc.).
3. Select drip or push; charge at checkout (signature drips \$139–\$169; NAD+ \$50 booster; glutathione and other pushes).
4. Members receive 20% off IV add-ons beyond the 2 included drips on ELEVATED IV.
5. Soft mention \$79 Wellness Assessment only if hormone/weight interest surfaces.

Lane B — Consult-gated

1. Patient pays \$79 Wellness Assessment via Stripe before or at booking.
2. In-person visit: history, vitals, goal confirmation.
3. Order goal-appropriate lab panel; draw same visit when possible.
4. Run CDS assessment in provider chart (staff) → physician review (prescriber only).
5. Results call: enroll program, collect consents, schedule RN teaching.
6. Never promise a specific medication before labs and physician sign-off.

Goal → lab routing

Goal	Panel	Charge	Tier
Weight loss / appetite	Expanded Panel / Weight Optimization	\$299	expanded
Advanced body recomposition	Expanded Panel / Weight Optimization	\$299	expanded
Low testosterone / men's vitality	Male Hormone Panel	\$299	expanded
Perimenopause / BHRT	Female Hormone Panel	\$299	expanded
Energy / fatigue	Foundational Labs	\$199	comprehensive
Injury / tissue recovery	Foundational Labs	\$199	comprehensive
Libido / sexual wellness	Sexual Wellness Labs	\$199	comprehensive
Longevity / anti-aging	Foundational Labs	\$199	comprehensive
IV hydration only	None — IV Lane A	—	—
General optimization	Foundational Labs	\$199	comprehensive
Pre-diabetes / insulin resistance	Expanded Panel / Weight Optimization	\$299	expanded
Erectile / male sexual function	Sexual Wellness Labs	\$199	comprehensive
Female libido / testosterone	Female Hormone Panel	\$299	expanded
Thyroid optimization	Foundational Labs	\$199	comprehensive
Anemia / iron	Foundational Labs	\$199	comprehensive
Aesthetics	None — IV Lane A	—	—

Lab safety redirects

Goal	Trigger	Action
Low testosterone / TRT	Prolactin elevated, PSA high, hematocrit >54%	Stop TRT path; physician phone deferral or referral.
GLP-1 / weight loss	Diabetic-range A1c, abnormal TSH, pregnancy, MTC/MEN2 history	Redirect before GLP-1 enrollment; document in chart.
BHRT	Unexplained bleeding, estrogen-sensitive cancer history, thromboembolic disease	Do not start estrogen pathway; physician review required.
IV Lounge	CHF, ESRD, pregnancy, anaphylaxis history	Hard block at IV screening — no walk-around.
Energy / fatigue	Low ferritin, abnormal TSH, low B12 on foundational panel	Treat root cause before peptide stack upsell.

Vendor routing

Lane	Vendor	Note
IV Lounge + FCC peptide backup	FCC (Formulation Compounding Center)	Myers premix, NAD+ backup vials
Metabolic / GC peptides + GLP-1	GC Scientific (503A network)	PATH lyophilized + STLKS injectables
Sermorelin, NAD+, BPC-157, TB-500	FCC (Formulation Compounding Center)	FCC when not on GC catalog line
GLP-1 sema/tirz fills	GC Scientific (503A network)	GC primary; FCC backup
All hormones (TRT/BHRT)	Custom Pharmacy of Evans	Custom Pharmacy of Evans fax default
Lab draws	LabCorp	LabCorp client billing

Consents

Consent	When
Hormone Therapy Consent	TRT, BHRT, any hormone protocol
GLP-1 Consent	Semaglutide, tirzepatide, metabolic program GLP class
Off-label / compounded disclosure	503A compounded therapies
Research Peptide Consent	BPC-157, TB-500, and other research peptides (not PT-141)
Substance acknowledgment (CDS)	Gray-zone candidates before ePrescribe handoff (RUO is hard-blocked)
Physician CDS review	Prescriber-only final approval in provider chart

Never say / never do

- We can start you on testosterone today without labs.
- Retatrutide is available à la carte like semaglutide.
- We offer ketamine or Spravato (legacy — not offered).
- Here is our full 100+ item peptide catalog — pick anything.
- The RN already approved your prescription (only physicians finalize).
- Your margin / our wholesale cost on this vial.
- Recommend CDS candidates when labs are not resulted (order labs first).
- Activate a program or send Rx without required consents on file.
- Bypass IV screening hard blocks for convenience.
- Quote member vs non-member lab COGS to patients.

- Turn on CDS pathway/candidate config without prescriber sign-off in database.
- Offer Tailor Made or gray-market peptide sources.

Printable visit checklist

1. Confirm lane: IV walk-in (A) vs consult-gated (B).
2. Lane B: \$79 Wellness Assessment collected before visit.
3. Match goal → lab panel (see goal-to-lab table).
4. Draw labs same visit when possible; Stripe panel tier correct (\$199 vs \$299).
5. Run CDS assessment; order labs if gate says needs_labs.
6. Physician reviews results before enrollment conversation.
7. Consents signed in portal before first dose/shipment.
8. Route Rx to correct vendor (GC / Evans / FCC).
9. RN injection teaching + dosing card provided.
10. Schedule follow-up / RN check-in.
