- Medication is INCLUDED in ELEVATED TRT / HRT / GLP-1 — never say “plus pharmacy costs.”
- NAD+ is ONLY the \$50 IV booster push — no peptide NAD+, no standalone NAD+ infusion.
- Ketamine / Spravato — not offered (legacy).
- Retatrutide — physician-selected within GLP-1 lane only; full consent; never headline or advertise.
- Injectable TRT (cypionate) — not offered. Anastrozole and HCG — not offered.
- Cash pay · no insurance billing · itemized receipts & superbills on request.
- Benefits end on membership cancel: quarterly labs revert to full price; 20% discount ends.

Member discount math: non-member price × 0.80 on all eligible à la carte. Program medication & bundled quarterly labs = \$0 while membership is active.

First-month typical investment: \$79 assessment + \$199–\$299 baseline labs + first program month (\$199–\$449) = roughly \$477–\$827 predictable thereafter.
